Everon installs first wireless nursing home system in Spain

Everon has installed a nurse call and safety system at Plaza Real / Grupo Baugestión's new unit in Gijón. The new location has a very high service level, including doctor's reception, gym, pool, cinema and chapel. The Spanish royal family and authorities will attend the inauguration festivities, too.

"This is the first major delivery for Everon in Spain. The customer will utilize both Everon Care devices and Everon Vega bracelets for different functions. This really shows the vast possibilities of our server based on-line care solutions." says Markus Merne, CEO of Everon Group

"Plaza Real is known for its high standards and quality. They have several units in Spain and we are negotiating and planning together next locations. The Everon system offers solutions for varied purposes and can be easily adapted to fit users individually. Our system connected Vega GPS watch bracelet opens up new possibilities for flexible solutions for leading providers like Plaza Real." states Oscar Montes, director of Everon in Spain.
