

PRESS RELEASE August 3rd, 2009

## **Urgentys GPS lone worker device under new ownership.**

The Urgentys, the GPS wristwatch lone worker device is now under new ownership. Everon of Finland recently acquired the intellectual property rights to the product from Canadian company, Medical Intelligence and aim to integrate Urgentys into their Everon system using the 868 MHz RF chip within the Urgentys. The Urgentys is already the most feature rich lone worker device on the market incorporating Assisted GPS and RF indoor positioning capability as well as giving users the ability to change their working status so that their GPS location is only displayed whilst they are on shift. Urgentys is also fully integrated into the Sentinel Plus alarm receiving software giving an easy integration into many leading Alarm Receiving Centres.

For more information contact Mark Johnson at Everon UK Limited on +44 8453 71 2850 or email [info.uk@everon.net](mailto:info.uk@everon.net)
